Overview of Training Schedule

Each morning segment of the training consists of large group didactic and videotaped demonstrations of actual sessions accompanied by discussion. The afternoon segments are practice-oriented with groups of 9-10 to discuss case vignettes and participate in role-play exercises. You will also break into smaller, supervised practice groups of 3 where each trainee rotates into roles of therapist, client, and observer offering ample opportunity to observe, practice and experience the process personally as a client would. There is also time set aside for case consultation in the small groups of 9-10 at the end of each training as well as optional Q & A sessions in between training segments to help trainees apply what they're learning with their own clients.
