The Center for Excellence
in EMDR Therapy

Training Overview

This one-day refresher course is for clinicians who have already completed the EMDR Basic Training and want to brush up on the core elements of the model. We will discuss EMDR as a psychotherapy approach that treats clients who present with a broad range of difficulties from PTSD to developmental trauma and attachment. We'll go through a step-by-step review of how to do it, while addressing the "why" behind what we do, using the AIP framework to inform our case conceptualization and treatment planning so it's more second nature to you. There will be plenty of time for discussion and review of actual client sessions from the History-taking phase through the Reevaluation phase to help hone your skills and build your confidence.
